

HOW TO STUDY FOR SCIENCE TESTS

1. WAYS TO STUDY LAB INFORMATION
 - a. Review Summary Questions
 - b. Highlight & Review Vocabulary
 - c. Data - Visualize your experiment and review the procedure
 - d. Read & Study all facts given in the lab
2. STUDY AND STUDY ANY NOTES Mark them.
3. STUDY LOG QUESTIONS These are an excellent review. Copy down the questions with your corrected answers. Study and Understand.
4. HIGHLIGHT big ideas. Put ? by those you aren't sure of. Put a * if important. More ***, if more. Underline key parts of ideas. Circle definitions. MARK up your paper as you read it.
5. Get someone to quiz you. Miss nothing that you can memorize.

Grade on last test _____

Steps done to prepare for next test _____

Grade on next test _____

What worked? _____ **What didn't**

Tip for next time:
